- (a). analysis of the respective parts of the Interim Statements as at 30.06.2022;
- (b). economic groundings of the fact that the Company has sufficient funds for payment of the 6-Month Dividend (as defined below);
- (c). economic groundings of the fact that the payment of the 6-Month Dividend would not lead to indebtedness of the Company to creditors, personnel, budget and other.

2. PROPOSED CONDITIONS OF THE 6-MONTH DIVIDEND

The MB proposes the payment of the 6-month dividend by the Company to the shareholders of the Company based on the Interim Statements as at 30.06.2022 under the following essential terms and conditions:

- *type of dividend:* cash
- *total amount of dividend (gross):* BGN 1,316,861
- *amount of dividend per share (gross):* BGN 0.10
- *period of payment of dividend:* from 14 October 2022 to 15 October 2023

(referred to hereinafter as the “**6-Month Dividend**”).

3. DIVIDEND POLICY OF THE COMPANY

The Company has established and consistently pursues a sustainable dividend policy in the recent years. As part of such policy, the Company has been traditionally paying out 6-month dividend in each of the last 5 years.

4. AIM OF PAYMENT OF THE 6-MONTH DIVIDEND

As of the present moment the Company follows a steady ascending line of its performance as an issuer on the Main Market of the Bulgarian Stock Exchange, the MB considers that the payment of the 6-Month Dividend would continue this ascending line of market performance and would strengthen the trust and credibility of the portfolio investors (both institutional and individual) in the Company, which the pursued aim is.

5. ANALYSIS OF THE PARTS OF THE INTERIM STATEMENTS 1H21 RELEVANT TO THE 6-MONTH DIVIDEND

5.1. Key Financial Indicators

The MB considers the payment of the 6-Month Dividend is determined mainly by the following financial indicators of the Company:

Financial Indicator	Amount	Notes
Profit before tax	BGN 3,135 thousand	
Current Ratio	2,13	Ratio: short-term assets / short-term liabilities
Debt to Equity Ratio	69,08 %	Ratio: debt / equity

The referred financial indicators prove that the Company is in a stable financial condition and has good liquidity.

5.2. Review of the Current Assets and Current Liabilities

The parameters of the 6-Month Dividend (amount and period of payment) depend mainly on the amounts on the current assets and the current liabilities of the Company, which according to the Interim Statements as at 30.06.2022 are, as follows:

	30.06.2022 BGN'000
Current assets	
Inventories	14,800
Trade and other receivables	2,203
Trade receivables from related parties	3,822
Cash and cash equivalents	2,785
Total:	<u>23,610</u>
Current liabilities	
Trade and other payables	10,346
Refund liabilities	-
Current tax liabilities	213
Finance lease liabilities	56
Payables to related parties	477
Total	<u>11,092</u>

The current assets significantly exceed the current liabilities.

The payment of the 6-Month Dividend is expected to be made entirely with funds, owned by the Company, out of the current assets.

5.3. Detailed listing of the Liabilities, Relevant to the Possibility for Payment of the 6-Month Dividend

By itself, the payment of the 6-Month Dividend, being a payment to shareholders out of equity, will not lead to indebtedness of the Company to third parties – creditors. Based on this, when proposing the dividend, the MB takes into account the current indebtedness, provided in Art. 115B, Par. 2, item. 1 of the POSA, and namely to creditors, personnel, budget and other, which are, as follows:

	30.06.2022 BGN'000
Payables to suppliers	9,284
Payables to personnel	352
Payables for social securities	180
Other	345
Total:	<u>10,161</u>

The essential conditions of these liabilities are:

- the trade liabilities are not interest bearing and are usually settled within 30-60 days;
- the public liabilities are settled in the statutory terms; and
- the other liabilities are not interest-bearing and are usually settled within 30 days.

The decrease of the current assets with the funds, which will be distributed to the shareholders with the payment of the 6-Month Dividend, would not affect their ratio to the current liabilities or result in delay or overdue payments of current liabilities.

6. Short-term Expectations on the Development of the Company for the Period from 30 June 2022 to 31 December 2022

The MB expects that in the period, in which is proposed the approval and the payment of the 6-Month Dividend, the Company:

- will uphold the quantitative and quality parameters of its production activity, will uphold stable revenue / cash flow from that activity in accordance with its usual course; and
- will uphold its share in the trade with heating devices on the Bulgarian market and will search for new partners for increasing its share on the European market.

7. CONCLUSIONS

On the grounds of the Interim Statements as at 30.06.2022 the MB considers that:

- The funds of the Company as of 30 June 2022 and which the Company is expected to have in the second half of the year 2022, are sufficient for the payment of the 6-Month Dividend; and
- The payment of the 6-Month Dividend does not threaten the current payment of liabilities of the Company to creditors, personnel, budget and other in the ordinary course of its business.

8. PRESENCE OF THE CONDITIONS FOR THE 6-MONTH DIVIDEND

The MB considers that in the event of resolution of the General Meeting of the Company in that sense, any and all of the conditions provided in Art. 247a of the Commerce Act and in Art. 115b, Par. 2 of the POSA for the payment of the 6-Month Dividend would be in place.
